PROFESSIONAL EXPERIENCE

Uber | Bangalore | Marketing Data Scientist II (6 months); Marketing Data Scientist (20 months) **Dec'23 - present**

Built a global communications metrics source of truth and forum, aligning Product, Engineering, and Marketing across regions

- Corrected a 45% iOS click undercount in Push and Email by leading a cross-functional audit with 50+ stakeholders, quantifying business risk and securing Product & Engineering prioritization—restoring accuracy in CRM measurements across NA and EMEA
- Standardized 15+ communication metric definitions, guided analysts to build a single-source-of-truth UI, driving adoption by 200+ stakeholders across three continents and providing leadership consistent cost and engagement views for planning and accountability

Designed statistical experimentation and orchestration for CCG platform to lift clicks and standardize long-term measurement

- Demonstrated platform effectiveness by designing a complex statistical experiment for Eats Push, establishing a 5.5% lift in Eats Push clicks, resolving data noise, validating metric reliability, and leading a 30+ member decision forum, including senior leadership
- Avoided a 3.4% negative click impact in Eats Email by statistically rejecting an underperforming group, delivering causal deep dives to uncover root causes, and partnering with Engineering to automate long-term measurement through an internal tool for faster adoption

Launched ML-powered chat topic model for airport trips to surface rider/driver friction points and drive operational actions

- Uncovered $180M annual gross bookings by building an ML topic modeling product on U.S. airport trip chats, launching an ML-powered, self-serve UI that surfaces actionable friction themes, now used by 10+ airport operations teams to guide interventions
- Delivered end-to-end pipeline from feature engineering to daily deployment, manually labeling topics for precision, transforming outputs into ops. insights, and systematizing workflows that expanded team automation capacity and accelerated onboarding timelines

Advised NA and EMEA marketing on multichannel campaign design, unlocking bookings via cohorting and targeting at scale

- Generated $24M incremental gross bookings by advising 10+ marketing managers across NA and EMEA on cohort discovery, channel mix, communication topic mix, and experiment design for Push, SMS, and Email campaigns, ensuring accuracy and execution at scale
- Captured $1.8M annual SMS cost savings by running a global communications forum that resolved issues through 50+ calls and 500+ Slack threads, identifying routing inefficiencies and aligning teams on optimization levers without degrading engagement metrics

Urban Company | Gurgaon | Data Scientist (Analytics manager) (16 months); Senior Data Analyst (10 months) **Oct'21 - Nov'23**

Protected $12M in annual gross bookings by scaling AI-driven partner response optimization across 40+ cities

- Prevented $12M annual booking loss by leading a 2-person team to design and deploy an ML model that blocked low-acceptance time slots across 40+ cities, reducing partner no-response rates by 3% and stabilizing supply-demand alignment at scale
- Standardized partner behavior metrics by streamlining data pipelines and embedding predictive thresholds into daily scheduling, equipping business and product teams with real-time insights that improved capacity decisions and reliability of partner response rates

Designed and scaled operational product innovations delivering $8.7M in gross bookings and 2.8% partner income uplift

- Unlocked $5.5M in incremental bookings by institutionalizing a "demand lost" ML framework for capacity planning, building consensus with the CBO and 8 category heads, and ensuring adoption across cities via business impact demonstrations
- Increased partner earnings by 2.8% and drove $3.2M incremental bookings by conceptualizing and launching "flexi slots" and "overlapping jobs" features, which reduced idle partner hours and maximized utilization while ensuring fairness for gig workers

Strengthened fraud detection and operational excellence, driving cost savings and earning accelerated promotions and awards

- Reduced appliance repair fraud attempts by 70% by creating a real-time detection interface, training 15+ operations staff to proactively flag anomalies, and delivering $80K in annual customer savings through proactive prevention of fraudulent claims and payments
- Promoted from Senior Analyst to Manager-level Data Scientist in only 10 months, receiving back-to-back UC Champion Awards in 2022 and 2023 as the sole team recipient for delivering projects with disproportionate business and operational impact

JIO Embibe | Bangalore | Data Scientist (AI Developer) (15 months) **Jul'20 - Sep'21**

- **Translation Platform:** Saved $90K p.a. by building an in-house language translation tool covering 9 Indian languages, mentoring 10 translators to migrate workflows, and enabling cost-effective vernacular content delivery for Embibe's K–12 gov. school integrations
- **Search Engine:** Delivered MVP for academic search in 4 months by collaborating with CEO, faculty, and engineers, securing Jio leadership approval for national rollout, and creating structured content pipelines that enhanced discovery for thousands of student users
- **Team nurturing:** Mentored 2 interns, standardized protocols, and improved handoff velocity; recognized for MVP impact

EDUCATION

Indian Institute of Technology, Kanpur | Master of Technology | Kanpur | CPI: 9.6/10 **Jul'18 - Jun'20**

- Awarded IME All-Rounder Award and 2 Academic Excellence Awards for the highest CPI in the batch (Rank 1 out of 80 students)
- Led Consulting Group mentoring 12+ students, organizing 20+ case prep weekends, and engaging 50+ alumni in projects

L.D. College of Engineering (Gujarat Technological University) | Bachelor of Engineering | Ahmedabad | CPI: 7.7/10 **Jul'14 - Jun'18**

- Scored 99.2 percentile among 194,000 candidates in GATE Mechanical 2018, placing in the top 1% nationally

VOLUNTEER COMMUNITY ENGAGEMENTS & EXTRACURRICULAR ACTIVITIES

- **Consultant, Teach for India (Aug'21- Jul'22):** Designed data-driven fellow allocation adopted for 20K+ students; mentored 2-person team and analytics intern on dashboards, ad-hoc analyses, and real-time impact tracking during national deployment
- **UpGrad Instructor (Oct'23- Jul'24):** Delivered 108-hour bootcamp to 47 professionals with 4.4/5 rating; drove 50+ enrollments and mentored weekend learners on Python, ML fundamentals, and industry-aligned project case studies with strong practical application
- **SOIL Institute of Management Mentor (Feb'23- May'23):** Taught 'Data-Driven Decision Making' to 120+ MBAs using real-world case studies; supervised 6 projects, improving data quality, presentation rigor, and final evaluation outcomes for student teams
- **HPAIR Delegate (Aug'22):** Won Dalberg Case Study at HPAIR 2022; represented India among 500+ delegates from 30+ countries
